WaterBoss i700 Water Softener

Efficient Technology in a Compact Design!

WaterBoss® Model i700 Water Softeners are built to give whole-house efficiency. The Model 700 can soften up to 70 grains per gallon and filters dirt and sediments that exist into the water. This water softener is the solution for all hard water conditions.

i700 Water Softener Facts

√ **The 700 offers whole-house softening.**

√ **There is a built-in, self-cleaning whole-house 20 microns sediment filter.**

√ **It's made 100% in the USA.**

√ **Effectively treats hard water problems.**

Big Savings During Operation

The WaterBoss® Model 700 takes about 18 minutes and uses only 60L (16 gallons) of water for the regeneration process. In addition, 1.1Kgs (2.5 pounds) of salt are needed for regeneration.

Bypass Valve

Simply turn the dial to "BYPASS" so water does not enter the appliance. To return appliance to service, simply turn the dial to the SERVICE position. Available with 3/4" or 1" IO & blending valve.

System Controller

Operates in three languages and retains cycle settings indefinitely, even though power outages. Time of day setting remains in memory for up to seven days without power.

Whole House, Built-in, Self Cleaning Filter

Filters dirt and sediment down to 20 microns – smaller than the human eye can see. Plus, there's never any cartridges to change and no maintenance is required.

Safety Shut-off System

To help prevent the possibility of any overflows, features a safety shutoff – just the kind of detail you would expect from.

Fine Mesh Resin

Vacuum packed high capacity softening media ensures maximum efficiency for hardness reduction.

Patented Mineral Tank

Our patented mineral tank with its screened distributor system, allows us to pack more resin in the tank and backwash our unit with clean soft water, therefore eliminating the need for a second mineral tank.

Grid Plate

The grid plate in the segregated brine tank compartment provides a clear well area to ensure consistent brine concentration.
